One stop shop for complete MEP solutions, EPC contracting and much more.

TURNING YOURS RISKS INTO OPPORTUNITIES

Increasing cost of energy, frequent power break downs, high Carbon foot prints and over whelming maintenance of conventional power systems, all are risks to economy and health.

The greatest technology converting all these risk into opportunities is the Photovoltaics where un-exhaustible and free natural resource is utilized to create power and energy.

CEO'S MESSAGE

A pure engineering company, already in the field of MEP and with lots of expertise in the field can be one of the best choices for your PV project solutions. MES is ready to listen to your requirement and provide you with the optimized solutions, whether it be your home, your office or an Industrial facility.

MUHAMMAD AMADUDDIN

MANSOOR KHAN

DIRECTOR'S MESSAGE

I highly suggest all individuals and companies having need of energy to come forward and utilize this renewable resources due to following non debatable reasons.

- Swift rate of return on the investments.
- High reliability of the system.
- Very low running cost.

FEATURES OF MES SOLAR SERVICES.

1 ENGINEERING.

- Free Estimates and BOQ
- Design from Approved Engineers

2 A-RATING EQUIPMENT.

- High quality inverters and Tier 1 Panels.
- Tin plated DC cables

3 SAFETY

- Approved Earthing and Durable Structure.
- Trained Staff.
- Quality and EHS management System.

4 TURN AROUND TIME

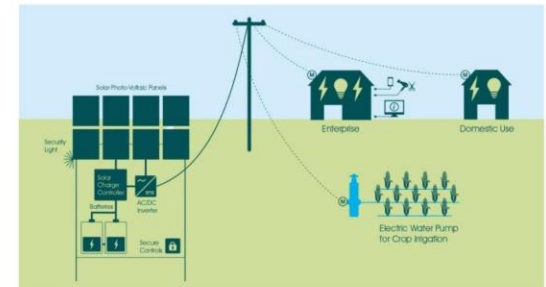

- Seam less Procedure
- Swift Processing of Leads.
- Efficient inventory Management.

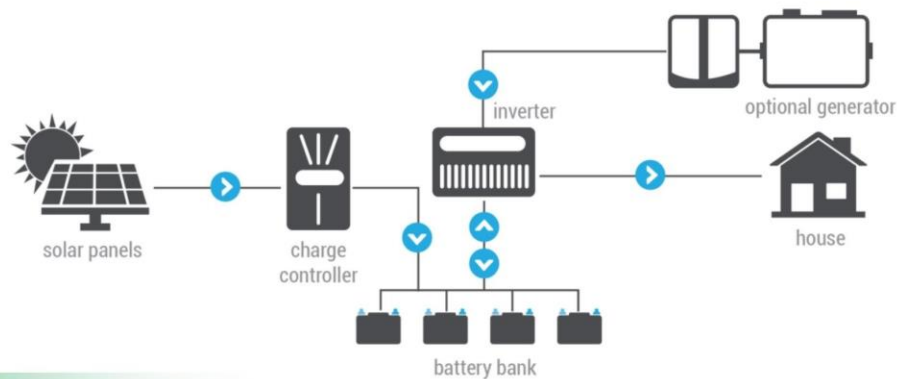

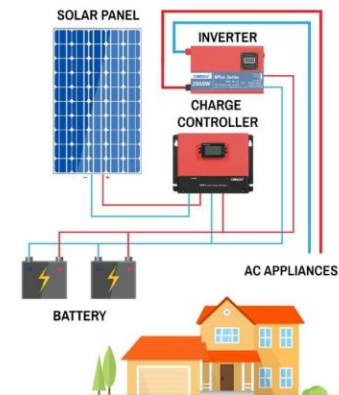

Micro Grid

5 OUR PV SOLUTIONS

- OFF Grid Systems (Appropriate for areas with load shedding in solar window)
- ON Grid Systems (Most efficient and low cost system, best for saving costs on electricity)
- Hybrid Systems (Combines properties of Off Grid and On-Grid System)
- DC Systems (Suitable for system less than 1 KWp)
- Water Pumping Solutions. (Irrigation and Domestic uses)
- Micro Grid Solutions.(Tailored Solutions for Individual Units)

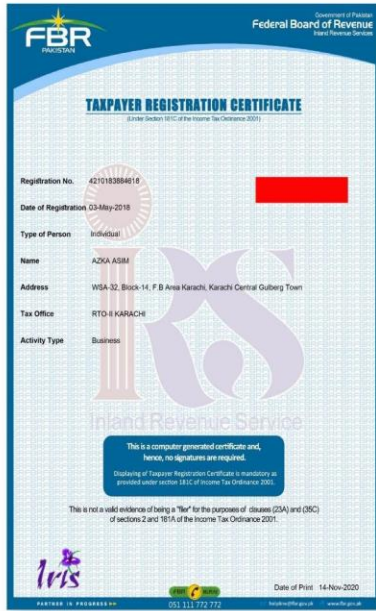

Off Grid System

Hybrid System

6 OUR CERTIFICATES.

THE BIG QUESTION – WHY MES?

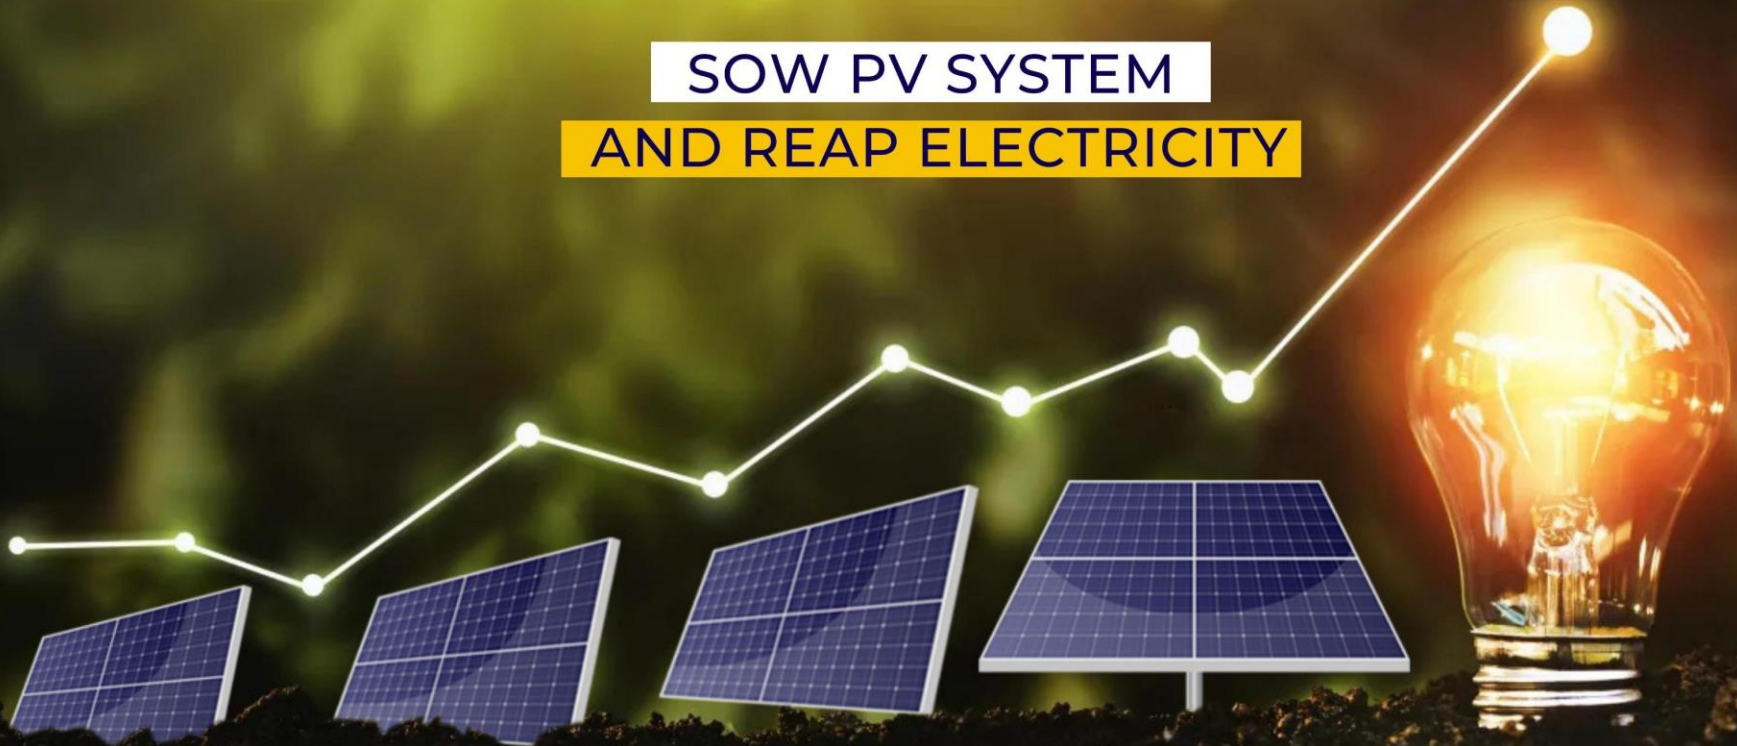

MES doesn't only focus on energy sales, rather we focus on the consumer energy demand and its efficient use. We will do free basic energy audits, BOQ and counselling of our customers to make sure they understand the true Perks of having solar electric self-generation.

MES enjoys the services of its trained technicians to cater any sort of complaints in the solar electric system. We continuously release updates in the form of videos and flyers regularly to update customers regarding safety and maintenance of the system.
